(For Address Only.)

Arrival of Royal Mail Steamer, Dominica. The arrival of the mail boat is always the signal for scenes of great excitement. News from "home" is eagerly sought by all the English and European residents, who depend mainly upon the mail's arrival for their English and "home" letters, papers, and news. The draught of water at the quays will not permit the near approach of the vessels, which unload the mails and passengers into boats.
